ABOUT

I am Amanuel Daniel, originally from Gambella, Ethiopia. I studied computer science at Jimma University, JIT campus where I gained a solid foundation in various aspects of computer science, including programming, algorithms, and data structures. My time at university provided me with hands on experience through projects, internships, and coursework, which helped me develop critical problem-solving skills and technical knowledge. Now, I am eager to pursue a career in software development and computer networking. I am passionate about creating innovative software solutions and am committed to continuous learning and professional growth in this dynamic field.

EDUCATION

Jimma University - *Jimma, Ethiopia*

B.Sc. – Computer Science, July 2024

PROJECTS

Final Year Project   May 2024

An Automated Fundraising System

- Developed a comprehensive website that seamlessly connects fundraisers with the potential donors. This platform simplifies the fundraising process of Ethiopia by offering a suite of intuitive functionalities.
- My role in this project involved developing the front end of the website using HTML, CSS, and JavaScript.

Community Based Training Program (CBTP)   June 2023

Criminal Record Management System

- Developed an integrated web-based CRMS for Jimma zone police station which provide services including Storage and retrieval of records, accessibility, and security.
- My role in this project involved developing the front end of the website using HTML, CSS, and JavaScript

WORK EXPERIENCE

Addis Media Network (AMN) – *Addis Ababa, Ethiopia*   July 2023 – August 2023

IT Technician

I was an intern in the department of hardware and networking at Addis Media Network. During the internship period I Collaborated with a team in installing, troubleshooting and maintaining hardware and networking equipment's of the organization.

- Received excellent evaluations in general performance (punctuality, reliability, communication, independence, and professionalism), personal skills (speed, accuracy, engagement, and teamwork), and professional skills (technical expertise, project support, task responsibility, and team quality) from the company. Additionally, the company affirmed the need for my contributions to their work.

PROFESSIONAL SKILLS

- Computer programming skills (C++ and Java).
- Front end web development skills (Html, CSS and JavaScript).
- Mastery of Microsoft office (word, Excel, PowerPoint).
- Excellent communication skill.
- Teamwork and Adaptability.

AWARDS AND HONORS
